

ASSESSMENT MONTH 3

1. SETTING UP AWS CONFIG

The image displays two screenshots of the AWS Management Console, specifically the 'Set up AWS Config' wizard in the eu-north-1 region.

Top Screenshot: Settings Page

- Navigation:** AWS Config > Set up AWS Config. Steps: Step 1 Settings, Step 2 Rules, Step 3 Review.
- Recording method:**
 - Recording strategy:** Customize AWS Config to record configuration changes for all supported resource types, or for only the supported resource types that are relevant to you. Global resource types (RDS global clusters and IAM users, groups, roles, and customer managed policies) might be recorded in more than this Region. [Learn more](#) You are charged based on the number of configuration items recorded. [Pricing details](#)
 - Options:**
 - ☒ **All resource types with customizable overrides**
AWS Config will record all current and future supported resource types in this Region. You can override the recording frequency for specific resource types or exclude specific resource types from recording.
 - ☐ **Specific resource types**
AWS Config will only record the resource types that you specify.
- Default settings:**
 - Recording frequency:** Configure the default recording frequency for all current and future supported resource types. It impacts the cost to your bill. [Pricing details](#)
 - ☒ **Continuous recording**

Bottom Screenshot: Override settings Page

- Default settings:**
 - Recording frequency:** Configure the default recording frequency for all current and future supported resource types. It impacts the cost to your bill. [Pricing details](#)
 - ☒ **Continuous recording**
Record configuration changes continuously whenever a change occurs.
 - ☐ **Daily recording**
Receive configuration data once every day only if a change has occurred.
- Override settings:**
 - Resource types to override** [Info](#)
Override the recording frequency for specific resource types, or exclude specific resource types from recording. If you change the recording frequency for a resource type or stop recording a resource type, the configuration items that were already recorded will remain unchanged.
 - Notification:** "All globally recorded IAM resource types" are initially excluded from recording to help you reduce costs. Choose **Remove** to remove the override and include these resources in your recording.
